

ORIGIN

Second Quarter 2025 Earnings Call

Enabling the world's transition
to sustainable materials

August 14, 2025

(COMPANY OVERVIEW)

FORWARD LOOKING STATEMENTS AND DISCLAIMERS

FORWARD-LOOKING STATEMENTS. This presentation and the accompanying oral presentation have been prepared by Origin Materials, Inc. (“Origin”) for informational purposes only and not for any other purpose. Certain statements included in this presentation that are not historical facts are forward-looking statements for purposes of the safe harbor provisions under the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements generally are accompanied by words such as “believe,” “may,” “will,” “estimate,” “continue,” “anticipate,” “intend,” “expect,” “should,” “would,” “plan,” “predict,” “project,” “potential,” “seem,” “seek,” “target,” “future,” “outlook,” and similar expressions that predict or indicate future events or trends or that are not statements of historical matters. These forward-looking statements include, but are not limited to, statements regarding Origin’s business strategy and plans for commercializing PET caps and closures, including the focus on product qualification and scaling supply in 2025 to enable commercial revenue in 2026; anticipated strong customer demand and a robust pipeline of prospective customers; the performance and sustainability advantages of Origin’s PET caps and closures, such as improved recycling circularity and compatibility with existing equipment; the impact of tariffs and the company’s response through manufacturing partnerships; projected financial performance, including expected revenue in 2026 and 2027 and the goal of achieving positive run-rate Adjusted EBITDA by 2027; the expected output, unit economics, and payback period of CapFormer manufacturing lines, as well as the timing for bringing additional lines online; the timing of product commercialization, including initial production milestones and ongoing customer qualifications; the size and prioritization of the addressable market for closures; the anticipated benefits and demand for Origin’s PET caps and closures, including potential for shelf-life improvement and enabling mono-material packaging; the ability to convert customer interest into revenue through signed MOUs and product testing; the scalability of Origin’s manufacturing systems and potential for technology licensing; and the impact of key partnerships on commercialization and distribution. The Company does not discount such indications of customer demand by the likelihood of their conversion to actual revenue or the time until such conversion. Some customers may overstate the amount of product they wish to purchase and one should not assume that demand figures disclosed by the Company will necessarily translate into comparable levels of revenue. The forward-looking statements are based on various assumptions, whether or not identified in this presentation, and on the current plans, objectives, estimates, expectations and intentions of the management of Origin and are not predictions of actual performance and inherently involve significant risks and uncertainties. These forward-looking statements are provided for illustrative purposes only and are not intended to serve as, and must not be relied on as, a guarantee, an assurance, a prediction, or a definitive statement of fact or probability. Actual events and circumstances are difficult or impossible to predict and will differ from assumptions. Many actual events and circumstances are beyond the control of Origin. These forward-looking statements are subject to a number of risks and uncertainties, including, but not limited to, the fact that Origin may be unable to successfully commercialize its products; the effects of competition, tariffs, and other trade restrictions on Origin's business; the uncertainty of the projected financial information with respect to Origin, particularly given the rapidly changing tariff landscape; disruptions and other impacts to Origin's business. Other factors that could adversely affect the Company's operations include those discussed in Origin’s Quarterly Report on Form 10-Q filed with the U.S. Securities and Exchange Commission (“SEC”) on August 14, 2025, under the heading “Risk Factors,” and other documents Origin has filed, or will file, with the SEC. These filings, when available, are available on the investor relations section of our website at investors.originmaterials.com and on the SEC’s website at www.sec.gov. If any of these risks materialize or Origin’s assumptions prove incorrect, actual results could differ materially from the results implied by these forward-looking statements. There may be additional risks that Origin does not presently know or currently believes are immaterial, that could also cause actual results to differ from those contained in the forward-looking statements. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. Origin undertakes no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required under applicable law. These forward-looking statements should not be relied upon as representing Origin’s assessments of any date subsequent to the date of this presentation. Accordingly, undue reliance should not be placed upon the forward-looking statements.

USE OF PROJECTIONS. This presentation contains Origin’s projected financial information. Such projected financial information is forward-looking and is for illustrative purposes only. It should not be relied upon as being indicative of future results. The assumptions and estimates underlying such projected financial information are inherently uncertain and are subject to many significant business, economic, competitive and other risks and uncertainties. Refer to “Forward-Looking Statements” above. Actual results may differ materially from the results presented in such projected financial information, and the inclusion of such information in this presentation should not be regarded as a representation by any person that the results reflected in such projections will be achieved.

FINANCIAL INFORMATION; NON-GAAP FINANCIAL MEASURES. This presentation includes projections regarding non-GAAP Adjusted EBITDA run rate, which have not been prepared in accordance with generally accepted accounting principles in the United States (GAAP). This non-GAAP financial measure is in addition to, and not a substitute for, or superior to, financial measures calculated in accordance with GAAP. There are a number of limitations related to the use of this non-GAAP financial measure versus its nearest GAAP equivalent. For example, other companies may calculate non-GAAP financial measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of this non-GAAP financial measure as a tool for comparison. We have not reconciled our guidance for non-GAAP Adjusted EBITDA run rate to GAAP due to the uncertainty and potential variability of reconciling items such as stock-based compensation. As a result, a reconciliation is not available without unreasonable effort and we are unable to address the probable significance of the unavailable information.

TRADEMARKS. This presentation contains trademarks, service marks, trade names and copyrights of Origin and other companies which are the property of their respective owners.

ORIGIN MATERIALS

INVESTMENT HIGHLIGHTS

100% PET CAP

Origin has developed breakthrough, proprietary technology for PET caps and closures.

HIGH DEMAND

Recurring revenue model, current demand exceeds projected manufacturing capacity for foreseeable future.

ATTRACTIVE GROSS MARGINS

Mid double digit %

EBITDA POSITIVE

Projecting Adjusted EBITDA positive run rate in 2027.

70+ PATENTS

Strong, comprehensive and young IP protecting the technology and products including PET caps and furanics.

CAN BE LICENSED

In discussions with potential licensees.

MARKET

>\$65B

Total addressable market for Origin closures

2026 REVENUE

\$20M-\$30M

Expected revenue generation with \$100M-\$200M in projected 2027 revenue

LINE PAYBACK

<18mo

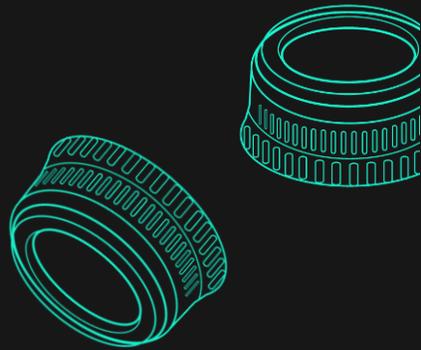

Expected time to payback on the manufacturing lines¹

¹ For certain scenarios, e.g., excluding the effect of tariffs.

GUIDANCE AT A GLANCE

Origin will focus on product qualification and expanding supply in 2025 to realize commercial scale revenue in 2026.

With strong business fundamentals and a clear path forward, Origin benefits from high demand, significant barriers to entry, and strong strategic interest from both customers and partners.

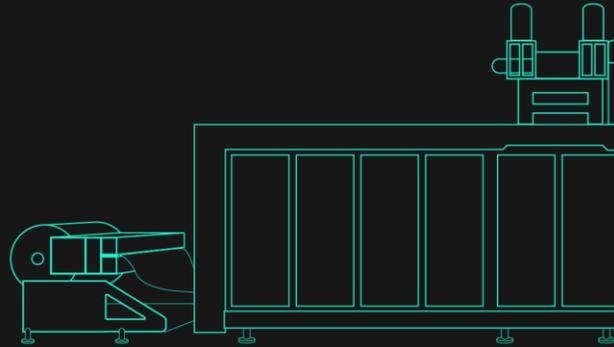

\$20M-\$30M

Expected revenue in 2026

\$100M-\$200M

Expected revenue in 2027

08-10

CapFormer Lines in 2026 to achieve Adjusted EBITDA positive on run-rate basis in 2027

EBITDA POSITIVE

Adjusted EBITDA positive on run-rate basis expected in 2027

ORIGIN TODAY

MANUFACTURING & COMMERCIAL

MANUFACTURING

Commenced production on First CapFormer Line February 2025

LINES
+08

On track for 8 to 10 CapFormer lines in 2026 to reach Adjusted EBITDA positive on run-rate basis in 2027

Arranging financing to ramp manufacturing capacity and maintain healthy cash floor

COMMERCIAL

Substantial pipeline of prospective customers engaged in testing and qualification. First publicly named customer Berlin Packaging.

First PET caps in stores as of August 2025. In market for flat water.

Signed customer MOUs. Caps being tested by some of the largest and most famous brands in the world.

with carbonated soft drink
qualification underway

OUR TEAM

Origin brings an unrivaled set of industry veterans, leaders, and visionaries.

John Bissell
CEO | Co-Founder

Founded Origin Materials in 2008

US EPA Presidential Green Chemistry Award

Matt Plavan
CFO | COO

Former CFO Cesca Therapeutics & Arcadia Biosciences

VP Finance, iMcKesson

30 years of leadership and board governance experience

Ryan Smith
Chief of Product Strategy | Co-Founder

Founded Origin Materials in 2008

Process Engineer at NEC Electronics

Josh Lee
General Counsel

Attorney at Irell & Manella, LLP

Sr. Analyst at Strumwasser & Woocher, LLP

Jay Hanan, PhD
Technical Fellow

300+ science and engineering publications and almost 300 patents

Inducted into the National Academy of Inventors

Former Chief Scientist, Niagara Bottling; formerly with NASA Jet Propulsion Laboratory

Leland Hansen
VP, Manufacturing

Extensive experience in overall performance, compliance and long-range planning of manufacturing projects

Ben Freireich, PhD
VP, R&D

10+ years experience in the chemical & process industries

Leading industry expert in R&D for solid materials

David Ballow
VP, Technology

Experience leading teams on capital projects of many sizes and stages of dev. including international and domestic projects

Formerly at WorleyParsons, Process Technology Manager at Burns & McDonnell

Bamidele Ali
VP, Sales & Business Development

Has run several successful businesses within Fortune 100 companies

Prior experience includes GE Healthcare, XG sciences, DSM Functional Materials & Danaher Corporation

Anna Richer
VP, Project Management Organization

14+ years of chemical industry experience in various engineering and project execution roles

Formerly at Dow Chemical Company, Corteva Agriscience

Duane Mazoch
VP, Supply Chain & Procurement

13 years at BP managing Engineering, Procurement and Construction

Prior 35 years as a Construction Director; Project Director; and Procurement & Contracting Director in oil, gas, petrochemical

Federico Barrai, PhD
VP, Product Delivery

15+ years experience in the refining and chemical industry

Leadership in R&D, technology development, technical services, commercial development, and sales.

OUR ADVISORS

B.O.D.

Experienced leadership team with a proven track record of creating shareholder value across manufacturing, operations, engineering, technology, and sustainability.

John Bissell
CEO & Co-Founder

Founded Origin Materials in 2008
US EPA Presidential Green Chemistry Award

Tony Tripeny
Chair

Former CFO at Corning, Inc; director at Mesa Laboratories, Inc.
30+ years of operational, strategy, and M&A experience

Kathy Fish

Former Chief Research, Development and Innovation Officer at Procter & Gamble
41 years experience with Procter & Gamble
Board Member at Balchem

William Harvey

Former President at DuPont Packaging and Industrial Polymers
40+ years chemical industry experience
Darden School of Business

Jim Stephanou

CEO of IPS (Integrated Project Services), a Berkshire Hathaway & engineering and construction services
Former VP and Head of Engineering and Projects at Merck & Co., Inc.
Former engineering and operations leader, Bayer, Inc.
40 years experience leading private and publicly held specialty chemical companies

John Hickox

Over 40 years experience in auditing, accounting, FP&A, corporate governance, and executive leadership
Former advisory partner at KPMG and Ernst & Young

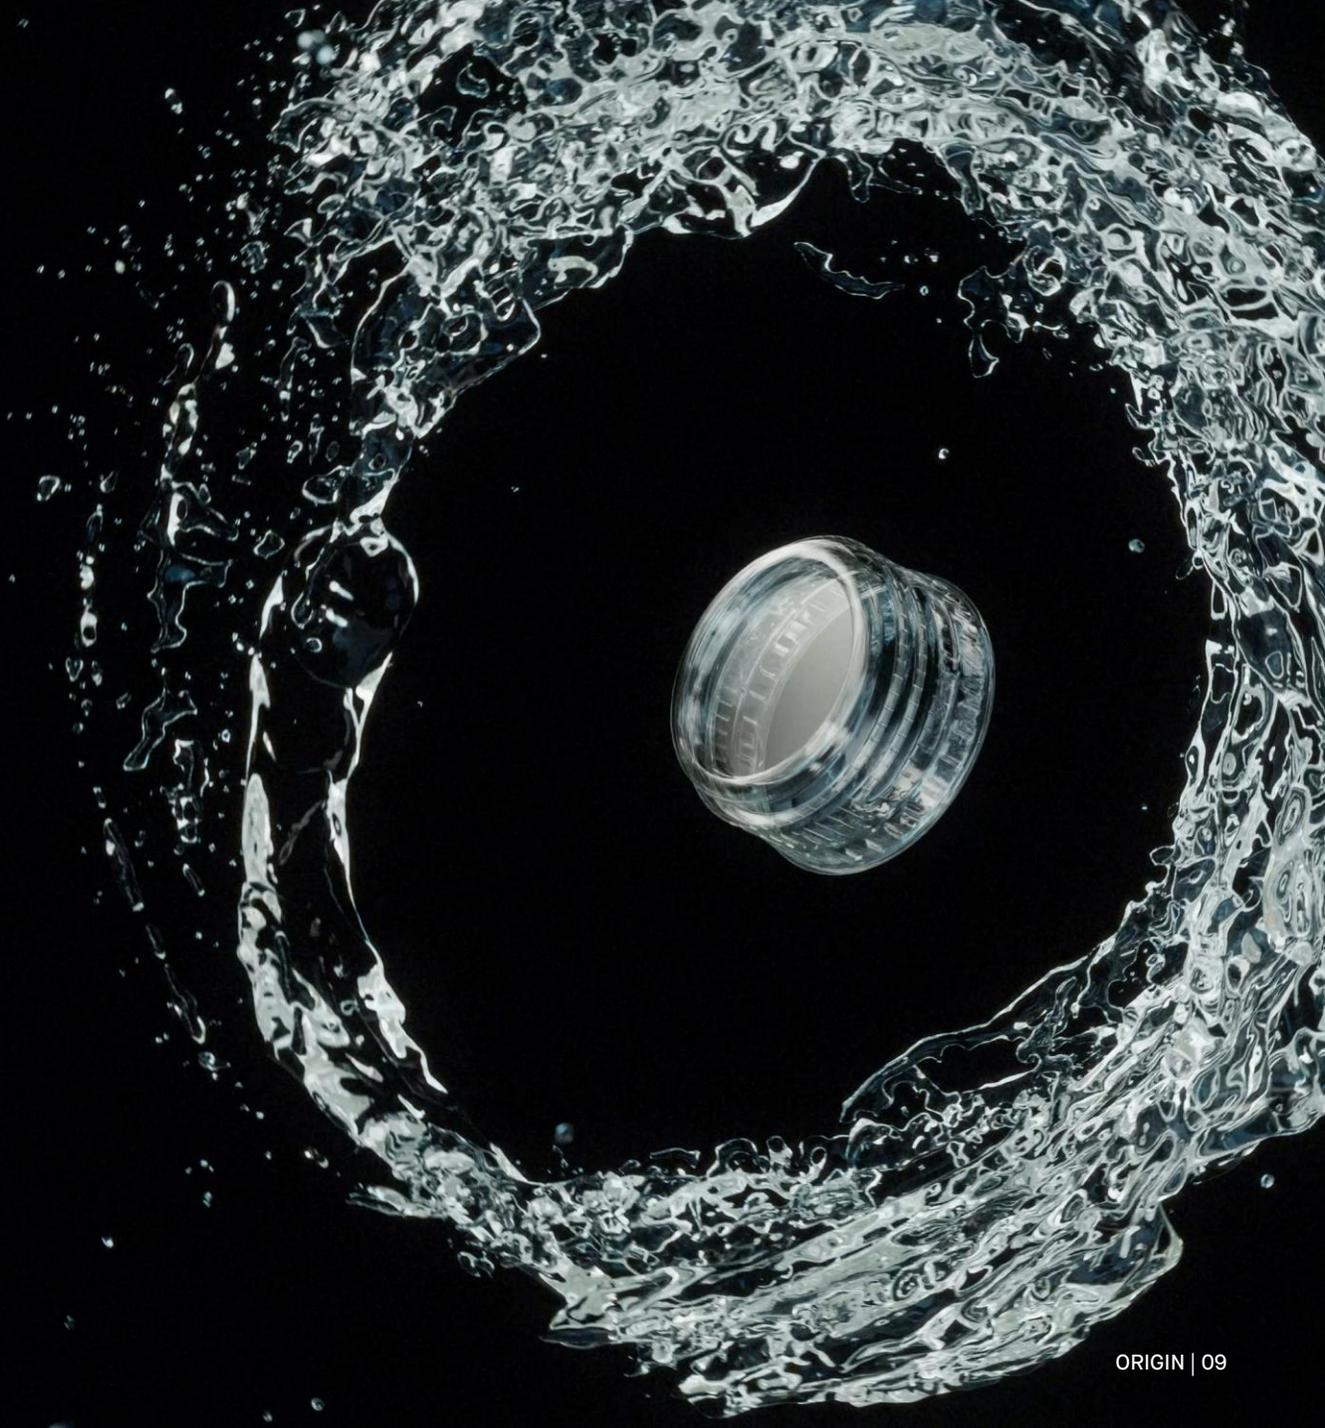

Craig Rogerson

Former Chairman, President & CEO of Hexion, Inc.; former Chairman, President & CEO at Chemtura Corp.
40 years experience leading private and publicly held specialty chemical companies

OVERVIEW

CAPS & CLOSURES

FIRST TO PRODUCE PET BOTTLECAPS AT SCALE.

In market for water, in qualification
with multiple global brands for CSD

MARKET SIZE:
Caps and Closure Sales

>\$65B

STRONG DEMAND PULL

- Long history of market need for PET closure solution
- Robust sales pipeline
- Compatible with existing customer equipment
- Cost-competitive with incumbent solutions

BETTER PERFORMANCE & SUSTAINABILITY

- PET offers superior barrier properties vs HDPE and PP¹
- Enables bottle lightweighting

IMPROVES RECYCLING CIRCULARITY

- From hard-to-recycle materials to easy-to-recycle PET
- Use off-the-shelf PET, including recycled PET (rPET)
- No additives needed to modify polymer
- Enables “mono-material” packaging
- Well-suited for tethered container solutions in the EU

¹ Currently the materials most used to make CSD 1881 compliant bottle caps.

CUSTOMER – BERLIN PACKAGING

Berlin Packaging is the world’s largest Hybrid Packaging Supplier® with 1,700 global suppliers, over 55,000 SKUs, and over 100 locations across the globe.

Berlin Packaging has agreed to purchase PET 1881 caps from Origin Materials for sale and distribution to its broad customer base.

“At Berlin Packaging, our sustainability strategy is focused on innovation, collaboration, and measurable impact. We are driven by the belief that Anything Is Possible, and we see that belief in Origin as well. We’re excited to partner with Origin to bring their world changing PET caps to our world-class customers.”

– Balaji Jayaseelan, VP of Sustainability at Berlin Packaging
August 5, 2025

PCO1881

PP | HDPE

CAP

NOT SAME MATERIAL

caps contaminate PET bottle recycling streams

PP | HDPE DOWNCYCLED

Typically reused in only non-food grade applications

PRODUCT QUALITY ISSUES

May have issues with taste, smell, or appearance

HIGHER PRICE FOR RECYCLED MATERIAL

Low rates of HDPE and PP recycling limit supply and raise the price of the recycled material

PCO1881

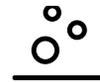

PET

ORIGIN's CAP

ENABLES CIRCULAR ECONOMY

Fully recyclable and can be made with 100% post-consumer recycled PET and used in food-grade applications

SUPERIOR PERFORMANCE

With improved barrier properties with respect to O₂ infiltration and CO₂ emission

MORE CUSTOMIZATION

Caps are naturally clear, with the option to add color, printing, or embossing

SCALABLE MANUFACTURING

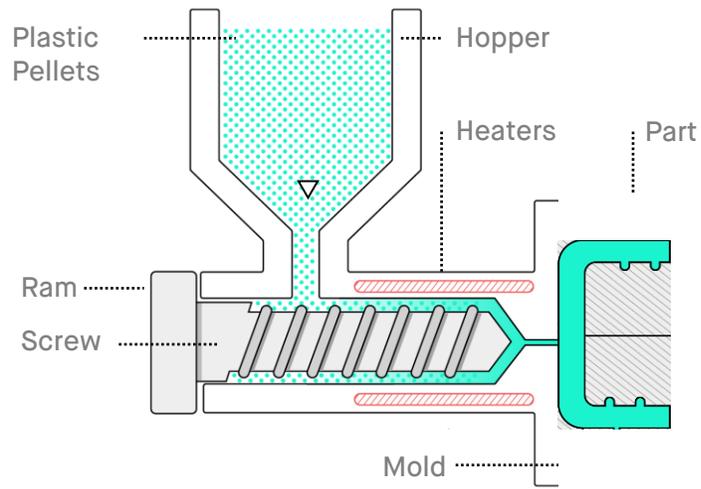

Able to support high volume supply for multiple cap types

Fundamental technology advantage – Origin PET caps beat alternatives

Origin has substantial patent protection and is set to lead a new category of closure

	Recyclable	Drop in	Potential for shelf-life improvement	Same material as PET bottle	Can be made with 100% recycled plastic	Aesthetics (clarity)	Lightest weight in class
THERMOFORMED							
ORIGIN							
HDPE PP Incumbent							
INJECTION MOLDED							

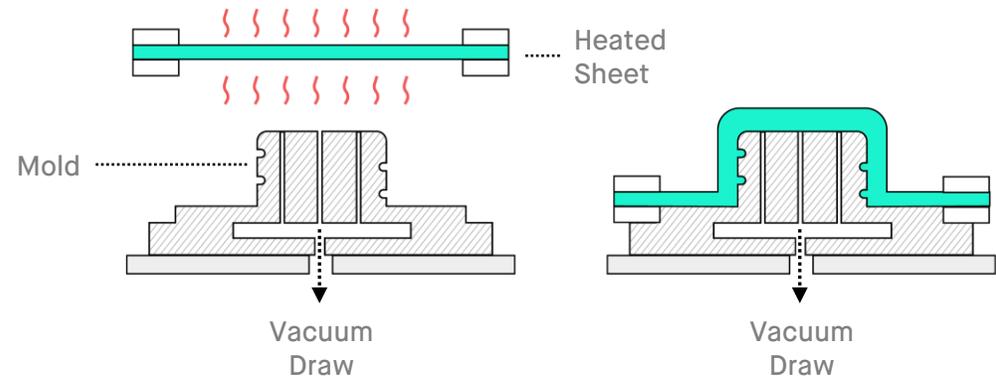

× TRADITIONAL INJECTION MOLDING

Problem:

- Only certain plastics work well (HDPE/PP)
- Difficult to eject from traditional molds
- Constrained by how fast molten plastic can move in a tight space to fill the mold
- Cycle time must decrease for bigger caps

✓ ORIGIN'S THERMOFORMING

Benefits:

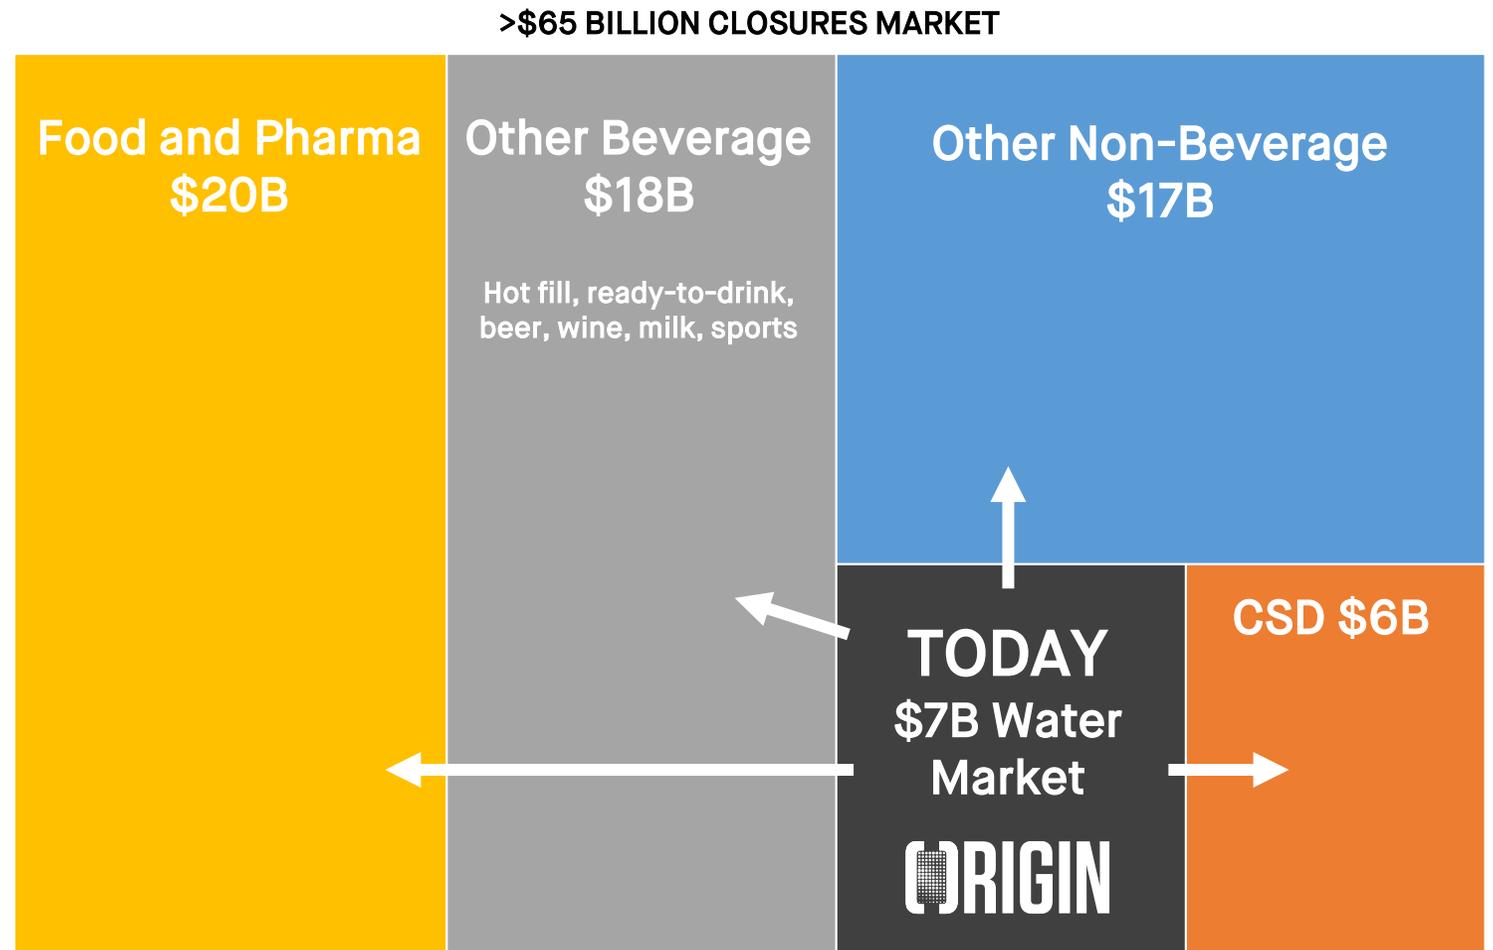

- Caps are formed and stamped
- Cycle time remains the same regardless of cap size
- Thinner caps are possible (lightweighting)
- Origin-patented process enables thermoforming of PET caps and closures

MARKET | DEMAND

We are in market with our 1881 cap for water (\$7B segment)

Our current strategic prioritization targets five large functional segments. Each segment utilizes different cap formats to achieve unique performance characteristics required by the product.

NOT JUST BEVERAGE CAPS.

Origin's technology can be used to make many kinds of closures with PET.

Note: Page not intended to represent that these are all Origin customers. Source: Press search and company websites.

STARTING WITH THE ORIGIN PET 1881

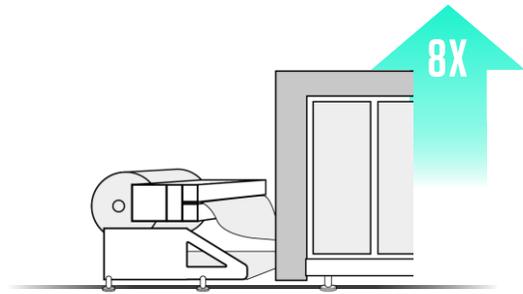

Commenced production in February 2025.
In market for flat water with CSD in
qualification.

CAP MATERIAL	PET / rPET
CONTAINER MATERIAL	PET /rPET
NECK FINISH	28mm PCO 1881
SECURTY	SLIT TAMPER BAND
WEIGHT	1.5 - 1.8g
FILLING	COLD ASEPTIC
BARRIER OF PET VS HDPE	~40X CO ₂ ~30X O ₂
CAPSULE TYPE	1 PIECE
SEAL FUNCTION	PLUG SEAL
CAP COLOR	TRANSPARENT CUSTOM

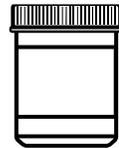

MULTIPLE GROWTH LEVERS

Enable Origin to grow and win.

ADDITIONAL LINES

~12 months from order to operation

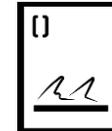

NEW FORMATS

Potentially hundreds of formats, & not just beverages

ADDITIONAL FEATURES

E.g., tethers, tinting, embossing

LICENSING

Scaling through partnerships

Acceptance Testing in the
second half of 2026

MASS PRODUCTION PARTNER – ROYAL HORDIJK

Hordijk is a leading Dutch producer of sustainable plastic packaging solutions in operation for over 100 years.

Hordijk further diversifies Origin’s manufacturing footprint in response to continued pressure from U.S. tariffs on European imports.

“At Hordijk, we believe the future of packaging is circular, and we are committed to innovation and reducing environmental impact. Partnering with Origin to mass produce PET bottlecaps and investing in extrusion to scale production aligns with our mission and roadmap. **We believe mono-material packaging solutions produced with Origin point toward the future of high-performing, sustainable products.**”

– Rik Hennink, CEO at Hordijk

SUBSYSTEM SUPPLIER

PackSys Global is the leading packaging machine producer for plastic closure slitting machines

PACKSYS GLOBAL

“PET closures can be a game changer for closure recycling. Most beverage closures are today made from HDPE and, while closure recycling rates are increasing, especially in Europe where closure tethering will be mandatory starting July 2024, a beverage container remains a two-material solution. HDPE suffers from degradation when re-used multiple times. Changing a closure to the same grade of PET as in the container avoids the need to separate the two materials and also solves the degradation topic at the same time.”

– Ueli Kobel, PackSys Global Slitting Division Dir.
